

IN THE CLAIMS:

Please amend claims 1-3, and add new claims 4-17 as follows:

1. (Currently Amended) An input terminal equipment of golf play information, comprising: a pocket-sized computer I/O terminal equipment main body whose size is in a range that portable for a golf player can carry said computer I/O terminal equipment main body; and having displaying means for displaying a plan layout of a golf course which can to be displayed on said terminal equipment main body and a corresponding sectional layout of the golf course showing elevations thereof, and an input member such as an electronic pen, wherein the golf player carries said terminal equipment main body when playing golf, and inputs for inputting golf play results and the like into said terminal equipment main body using said input member so that the golf play information can be stored.
2. (Currently Amended) An ~~input terminal equipment and an~~ analyzing system of golf play information, comprising:
- a at least one pocket-sized terminal equipment main body and a respective data input member whose size is in a range that portable for a respective golf player can carry said terminal equipment main body; an input member such as an electronic pen and
- a computer ~~main body which is installed in a suitable position such as a club house and is capable of~~ for editing and analyzing data loaded from stored in said terminal equipment main body;
- a cradle ~~main body which is capable of~~ dedicated for loading said terminal equipment main body and collectively managing the data in from said terminal equipment main body into said computer; and
- an output mechanism for outputting ~~taking out~~ information ~~which was~~ edited or analyzed by said computer ~~via electrical means such as a digital copy machine or a laser printer.~~
3. (Currently Amended) An ~~input terminal equipment and~~ analyzing system of golf score play information according to claim 2, wherein said computer is connected

with via a communication system ~~such as~~ with web contents ~~via world wide web (WWW)~~ so that the data ~~which were~~ edited or analyzed by said computer can be visually captured in a remote place.

- 
4. (New) An analyzing system of golf score play information according to claim 2, wherein said computer is connected with the world wide web (WWW) so that the data edited or analyzed by said computer can be visually captured in a remote place.
 5. (New) An analyzing system of golf score play information according to claim 2, wherein said computer is connected with the Virtual Training Repository (VTR) to retrieve visual information therein.
 6. (New) An analyzing system of golf score play information according to claim 2, wherein the input member is an electronic pen.
 7. (New) An analyzing system of golf score play information according to claim 2, wherein the displaying means further displays a corresponding sectional layout of the golf course showing elevations thereof.
 8. (New) An analyzing system of golf score play information according to claim 2, wherein the displaying means further displays a corresponding sectional layout of the golf course showing elevations thereof.
 9. (New) An analyzing system of golf score play information according to claim 2, wherein the computer ranks and averages play results of different players inputted via respective terminal equipment main bodies.
 10. (New) An analyzing system of golf score play information according to claim 2, wherein the output mechanism includes a printer or a copy machine.
 11. (New) An input terminal equipment of golf play information according to claim 1 ,

wherein the input member is an electronic pen.

- 
12. (New) An input terminal equipment of golf play information according to claim 1 , wherein the displaying means further displays an enlarged diagram of a putting green portion of the golf course after the putting green portion of the golf course is indicated by the input member.
 13. (New) An input terminal equipment of golf play information, comprising: a pocket-sized terminal equipment main body portable for a golf player having a plan layout of a golf course to be displayed on said terminal equipment main body and an electronic pen for plotting golf play results into said terminal equipment main body.
 14. (New) An input terminal equipment of golf play information according to 13, wherein the electronic pen is used to click an arrival position or draw a trajectory of a golf ball on the plan layout.
 15. (New) An input terminal equipment of golf play information according to 14, wherein the terminal equipment main body calculates a carry or residual distance based upon information of the arrival point or the trajectory of a golf ball on the plan layout.
 16. (New) An input terminal equipment of golf play information according to 15, wherein the carry or the residual distance is displayed by the displaying means.
 17. (New) An input terminal equipment of golf play information according to claim 13, wherein the displaying means further displays an enlarged diagram of a putting green portion of the golf course after the electronic pen clicks or draws on the putting green portion of the golf course.
-
